Details

- Secret type: [Generic High Entropy Secret](#)

- Repository: TheBlueBear02/auto_mail_invoices

- Pushed date: September 14th 2024, 15:52:47 UTC

Fix This Secret Leak

Mark As False Positive

A false positive can occur when the detection engine raises an alert for a secret that is not one and has never been one.

You are receiving this email as part of our **Good Samaritan program**, where we proactively alert GitHub users when one of their secret is inadvertently leaked on a public repository, helping secure the coding community.

Need help to remediate an exposed secret? Read our guide and never let another secret leave your local environment with GitGuardian's cli tool **ggshield**
